DeepTech Solutions

COMPANY PROFILE

Complex systems, made clear.

TECHNOLOGY ADVISOR · DAMMAM, SAUDI ARABIA

Microsoft CERTIFIED Partner

About Us

A Saudi technology company and Microsoft partner, headquartered in Dammam.

WHO WE ARE

Deep Tech Solutions helps organizations choose, implement and support the systems they run on, including Microsoft Dynamics 365, Saudi payroll and compliance, cybersecurity, and cloud and infrastructure. One team remains accountable from the first assessment to ongoing support.

OUR EXPERTISE

Our consultants and engineers have delivered projects for organizations in contracting, energy, real estate and industry. They combine technical depth with a working knowledge of Saudi requirements, from ZATCA and GOSI to the NCA's cybersecurity controls.

Vision and Mission

The direction that guides our work, and the commitment we make to every client.

OUR VISION

To be the technology advisor organizations across the Kingdom rely on to make decisions with clarity and carry them through with confidence.

We work toward a future in which every organization we serve runs on systems that fit the way it works and support its growth, in line with the goals of Saudi Vision 2030.

OUR MISSION

To guide our clients to the right technology decisions, deliver solutions built for their operations and for Saudi requirements, and stand behind every system long after go-live.

Advise	Understand each client's business before recommending any system.
Deliver	Implement in phases, with documented results at every stage.
Comply	Build Saudi regulatory requirements into every solution from the start.
Support	Provide responsive support under defined service levels.

Our Core Values

The principles that guide how we work with every client.

01

Excellence

Delivering high-quality solutions that consistently exceed expectations.

02

Integrity

Building trust through transparency, accountability and ethical practice.

03

Innovation

Applying modern technologies to solve complex enterprise challenges.

04

Customer Focus

Putting client needs at the centre of everything we design and deliver.

05

Commitment

Doing what we promise, on time and to the agreed standard.

Our Services

Integrated technology services for organizations across the Kingdom.

From enterprise systems and Saudi payroll to cybersecurity, cloud, infrastructure and industrial AI, our services are designed to work together.

01

Microsoft Dynamics 365

ERP implementation, integration and support, including ZATCA e-invoicing.

02

Matrix HR and Payroll

Our proprietary HR and payroll system, built for Saudi labour regulations.

03

Cybersecurity

Assessments, protection, monitoring and compliance with Saudi requirements.

04

Cloud and Productivity

Microsoft 365, Microsoft Azure and licensing solutions.

05

Infrastructure and Support

Networks, servers, backup and recovery, and managed IT services.

06

Industrial AI Solutions

AI-driven analytics for industry, delivered with global technology partners.

Microsoft Dynamics 365

Better control of finance, projects and operations, with one set of numbers for leadership.

Microsoft Dynamics 365 brings finance, supply chain, projects and people into one system, with a live view of performance. We implement it in phases, configured to Saudi requirements, with ZATCA e-invoicing included from the start.

Business Process Analysis

Fit-gap analysis of your current processes, agreed before any configuration begins.

Finance and Supply Chain

General ledger, procurement, inventory and sales, configured to your operations.

Project Operations

Project costing, progress billing and retention for contracting businesses.

ZATCA E-Invoicing

Phase 2 clearance and reporting in Dynamics 365, including FATOORA onboarding and testing.

Reporting and Dashboards

Executive dashboards in Power BI and Power Apps on live ERP data.

Every implementation includes role-based training, go-live support and ongoing optimization.

Matrix HR and Payroll

Complete HR, payroll and workforce operations, from hiring to final settlement.

Matrix is our proprietary HR and payroll system, developed and maintained by Deep Tech Solutions. It applies Saudi labour rules automatically and runs as a standalone system, or integrates with Microsoft Dynamics 365 and any other system your business uses.

Hire-to-Retire Lifecycle

Full coverage from hiring to leaving: recruitment, onboarding, contracts, documents, transfers and exit, in one employee record.

Payroll, WPS and Benefits

Automatic salary, allowance and overtime calculations, WPS files for Mudad, and benefits from medical insurance to end-of-service.

Government Integration

Connected with GOSI, Qiwa and Muqeem, with Saudization tracked against Nitaqat requirements.

HR Portal and Self-Service

A dedicated portal for the HR team, and self-service for employees to view payslips, submit requests and track approvals.

Fleet and Accommodation

Company vehicles and staff housing managed in one place, from assignment and occupancy to renewals, maintenance and costs.

HR Dashboards

Live views of headcount, payroll cost, Saudization and document expiries, for HR and management.

Cybersecurity

Protection for your systems and data, from assessment to ongoing monitoring.

We assess your environment against the NCA Essential Cybersecurity Controls (ECC-2:2024) and the Personal Data Protection Law, agree priorities with you, and close the gaps in order of risk. The result is stronger protection, and evidence your auditors can rely on.

Security Assessments and Risk Analysis

A scored baseline against national controls, with a prioritized remediation plan.

Network and Endpoint Protection

Firewalls, endpoint security and Microsoft Defender, configured for your environment.

Security Monitoring and Incident Response

Alerts monitored and acted on, with a defined response plan.

Compliance Management

Ongoing tracking of controls and documentation as regulations and your systems change.

Aramco CCC Readiness

Preparation for Aramco's Cybersecurity Compliance Certificate under the SACS-002 standard.

Policies and Awareness

Security policies and staff awareness training based on recognized frameworks.

Cloud and Productivity

Secure collaboration and cloud services for a modern workplace.

We move email, files and workloads to the Microsoft cloud and set up the tools your teams use every day. With Microsoft's Saudi Arabia East region in the Eastern Province, your data can stay in the Kingdom.

Microsoft 365 Deployment

Exchange, Teams, SharePoint and OneDrive, configured and secured for your organization.

Email and Data Migration

Mailboxes and files moved from on-premises or other platforms, with a planned cut-over.

Collaboration and Document Management

Teams and SharePoint structured around how your departments share work.

Microsoft Azure Migration

Servers and applications moved to Azure, with in-Kingdom data residency where required.

Licensing and Cost Optimization

Licence assessment, subscription management and right-sizing to actual use.

User Adoption

Training and guidance so your teams get full value from the tools you pay for.

Infrastructure and Support

Reliable IT foundations, supported by engineers who know your environment.

We design and build the networks, servers and backup systems your business depends on, then keep them running under clear service levels. Managed-services clients have one point of contact for every issue, from a single laptop to the data centre.

Network Design and Implementation

LAN, WAN, Wi-Fi and firewalls for offices, sites and warehouses.

Servers and Virtualization

Server design, virtualization and consolidation for performance and lower running costs.

Backup and Disaster Recovery

Backup and recovery plans, with recovery tested on a schedule.

Managed IT Services

Proactive monitoring, patching and maintenance of your IT environment.

Helpdesk and Technical Support

Responsive support under an SLA, remotely and on site.

Performance and Technical Advisory

Regular reviews and recommendations to keep your IT efficient and secure.

Industrial AI Solutions

Turning operational data into better reliability, efficiency and safety.

Saudi industry is digitalizing rapidly, in line with Vision 2030 and the National Industrial Strategy. Through partnerships with specialist technology companies from around the world, we help plants and industrial facilities apply artificial intelligence to the operational data they already collect.

Our Approach

Every engagement follows four defined stages, with clear deliverables and client approval at each step.

01.

Assessment and Consultation

Understanding business needs, current architecture, constraints and strategic challenges in depth.

02.

Solution Design

Creating tailored IT strategies and architectures aligned to outcomes, budget and timeline.

03.

Implementation

Delivering solutions in planned phases, with clear milestones and minimal disruption to daily operations.

04.

Support and Optimization

Continuous improvement, performance tuning and long-term partnership beyond go-live.

Six Reasons Enterprises Trust Deep Tech Solutions

The strengths behind every engagement we deliver.

Microsoft CERTIFIED Partner

Microsoft Partner

Proven expertise across Dynamics 365, Microsoft 365 and Microsoft Azure.

Skilled IT Professionals

Certified consultants and engineers with hands-on experience in Saudi projects.

ZATCA and Local Compliance

Strong command of Saudi requirements, from ZATCA and GOSI to NCA and PDPL.

Integrated Solutions

ERP, payroll, security and infrastructure delivered as one coordinated programme, by one accountable team.

Long-Term Partnership

Regular reviews and continuous improvement as your business grows.

Proprietary Saudi Solutions

Matrix HR and Payroll, our own system built for Saudi organizations, developed and supported in-house.
